Re: U.S. Patent Application No. Not yet assigned
Entitled “Method for Customizing Business Logic in a Business Process System”
Inventors: Geoff Grindrod, Oto Slavos, Saigiridhar Kodali, and Clinton Hallman
NAI File No.: 01.024.01 Attorney Docket No.: NETAP012

Enclosed are documents for the above-reference patent application. Assuming that everything is in order, to prepare for the filing of the patent application with the U.S. Patent and Trademark Office, please review, sign, and return the Combined Declaration and Power of Attorney form to me as described below. Once I receive the executed documents, I will proceed to file them with the United States Patent and Trademark Office.

The Declaration formally “applies” to the patent and the Power of Attorney gives me the power of attorney to prosecute the application in the Patent Office. The Declaration lists four joint inventors. You should read the specification and claims, review the drawings, and read the combined Declaration and Power of Attorney form prior to signing. If everything is correct in these papers and you understand and agree with the statements in the form, you should sign and date the Declaration where indicated. *It is improper to alter or mark the specification and claims or the declaration once the signing commences.* If there are any questions or if anyone uncovers any errors or omissions, please call me and we will work out a solution before signing of this document.

The Assignment formally makes of record that Networks Associates Technology, Inc. owns this invention and that the inventors are transferring full ownership of the invention
